

EFD Induction is looking for a **Global Engineering Director**

EFD Induction has been developing induction heating solutions for more than 65 years. Today, we are one of the largest industrial induction equipment makers, with sales and service companies, manufacturing plants and R&D centers around the world. The group has 1000 employees worldwide. The corporate language is English.

The Global Engineering Director will be responsible for development and coordination of the engineering area in the group. The position will be located either in Freiburg, Germany or in Skien, Norway.

EFD Induction offers:

- A dynamic and international environment with worldwide customer base
- State of the art products and technology
- Inspiring customers and projects
- Competitive terms and benefits
- Excellent development perspectives
- Our company values: Respectful, Reliable, Cooperative and Passionate

Responsibility and tasks:

- Lead the Global Engineering Management Team
- Improvement of common tools, processes and guidelines
- Competence development of engineering teams
- Global resource management across all EFD Induction engineering sites
- Training & implementation of common engineering guidelines

Requirements:

- Mechanical/ Electrical Engineer with strong background from industrial machinery design
- Extensive management experience
- Systematic work style, pro-active and problem-solving attitude
- Good communication skills and fluency in oral and written English
- Ability to work in a matrix organization
- Willingness to travel internationally
